Beschreibung

123 Web Messenger Introduction:
123 Web Messenger is a real-time instant messaging software for your own website.

It has four forms: web-based Friend List; web-based 1 to 1 Chat Invitation; an optional Instant Messaging Desktop Client Application with friend list function, and Facebook Messenger Style Web Chat Bar, empowering your website with a Facebook like web messenger. All of the clients are secure, reliable and feature-rich with ease of use.

vBulletin IM Introduction
The vBulletin Instant Messaging Addon for 123 Web Messenger is a FREE application, which can help you integrate your vBulletin Database with 123 Web Messenger to add a FREE 1-to-1 Chat Solution like Facebook Chat at the bottom of your vBulletin forum.

Features of the vBulletin IM for 123 Web Messenger
1) Auto-login
Successful integration guarantees Auto-login. So users logged in the vBulletin website don't have to re-enter username or password to access123 Web Messenger Chat.

2) Facebook Messenger Style Web Chat Bar
Facebook like instant Messaging is a form of 123 Web Messenger, which allows users the ability to chat with each other or leave offline messages in the Friend List: click the "Friends" icon on bar to popup the Friend List.

What's more, the Facebook Messenger Style Web Chat Bar could be customized with external web applications loaded.

3) Free Integration Service from 123 Web Messenger
123 Web Messenger supplies free installation and integration support to both license buyer and hosting service buyer. Of course, there is also detailed Integration Direction in the Readme.
